

Kip Waite

Kip combines a unique blend of clinical knowledge, military discipline, and analytical prowess to effectively bridge gaps between technical, clinical, and administrative functions. He is committed to improving healthcare systems through data-driven insights and collaborative efforts. Kip excels as a liaison between technical, clinical, and administrative stakeholders in various domains including research, quality, performance improvement, and financial throughput. He possesses expertise in data integrity, lineage, stewardship, analysis, and reporting, particularly in imaging studies, pathology studies, clinical workflow, and surgical curative efforts in breast healthcare.

Kip had a distinguished military career as a USAF enlisted Arabic linguist from 2004 to 2010. During his service, he received numerous awards and medals, completed two theater deployments, and was honorably discharged. He holds a liberal arts bachelor's degree from St. John's College of Annapolis (2015), earning a double major in philosophy and the history of mathematics and science, along with double minors in classical studies and comparative literature.

He possesses foundational clinical experience which cements his unique data analytics and workflow expertise; EMT license, formal shadowing, cadaver labs, shock trauma observership, and summer orthopaedic internship. He was also an orthopaedic research assistant participating in published papers. Notably, he was a dedicated Breast Quality Analyst for three years and is currently a Health System Manager in Analytics and Reporting.

In his spare time, Kip enjoys his family and home improvement projects.
